

Cloud Data Technologies

believes...

Cloud Data Technologies

believes...

you should be able to
easily share information
between software
applications

Cloud Data Technologies

believes...

you should not have to re-
enter data, or copy and
paste it, every time you
receive documents

Cloud Data Technologies

so we...

support data standards
development efforts

like UN/CEFACT

EdiBuild Europe

and BuildingSMART UK

Cloud Data Technologies

so we...

help develop and improve
data exchange standards
for business documents
like

invoices

orders

complex tenders

Cloud Data Technologies

which means...

that software companies
can implement those
standards in their products

Cloud Data Technologies

which means...

(and we do that too)

Cloud Data Technologies

which means...

and you can send and receive
business information
electronically
with minimal effort

Cloud Data Technologies

*"helping make data
exchange easier
and faster"*

`</Address></Buyer><Value>£10,000</Value></Order>`

Cloud Data Technologies

*"helping make data
exchange easier
and faster"*
